# PRDA–03 HR ANALYTICS

## KPI Values & Dashboard Analysis Report

## 1. Executive KPI Summary

| 22,214 | 24.75% | 75.25% | 38.43 |
|---|---|---|---|
| TOTAL EMPLOYEES | REMOTE WORKERS | HQ WORKERS | AVERAGE AGE |

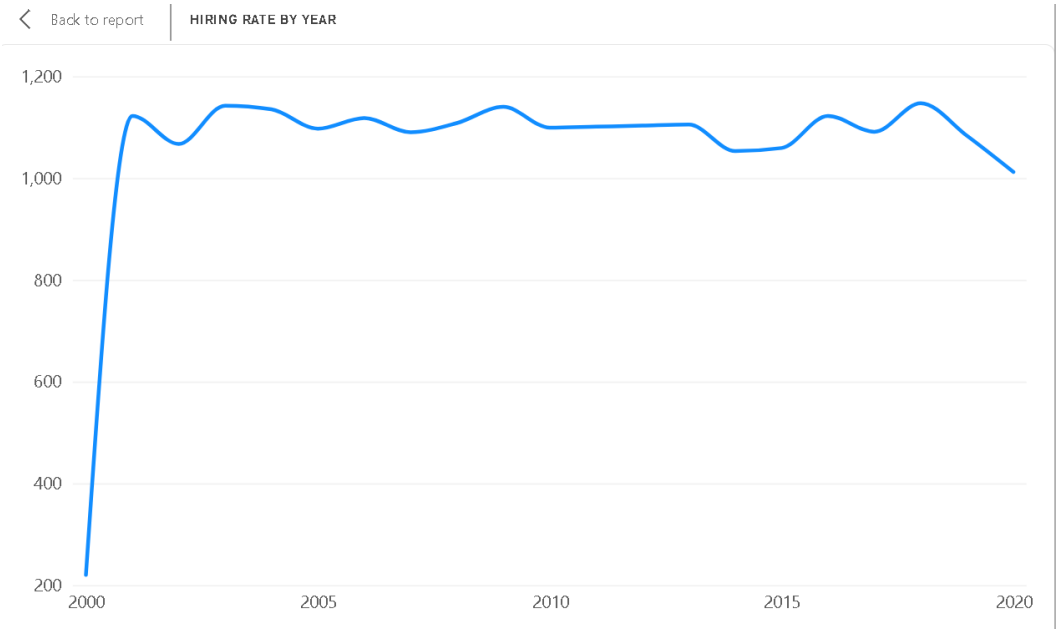

## 2. KPI Interpretation

- Total workforce: 22,214 employees.
- Remote workforce: 24.75%; Headquarters workforce: 75.25%.
- Average employee age: 38.43 years.

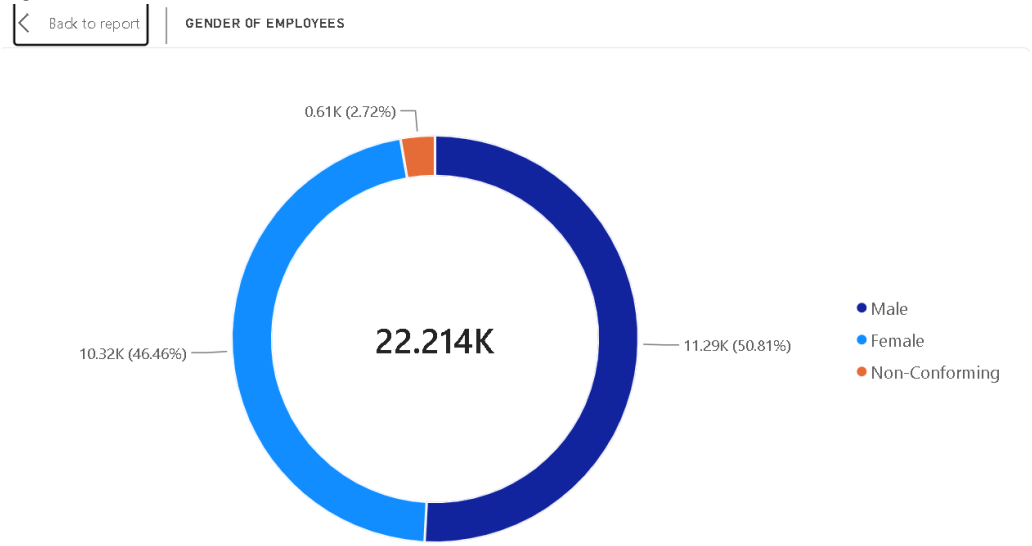

## 3. Dashboard Visualizations

The following charts are the screenshots supplied for the project. They are included without modification.

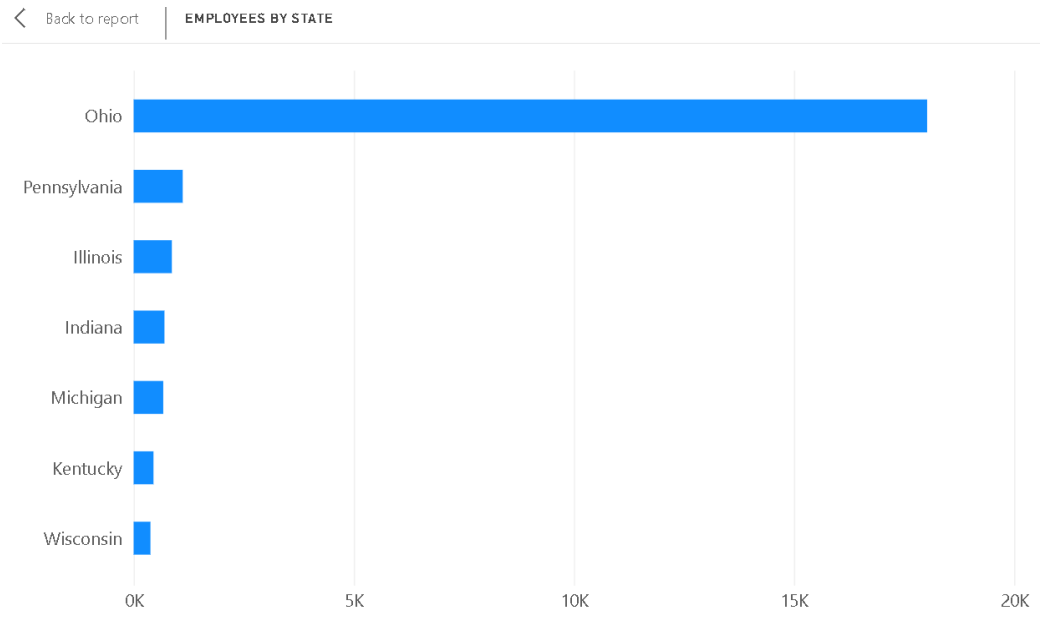

### Hiring Rate by Year

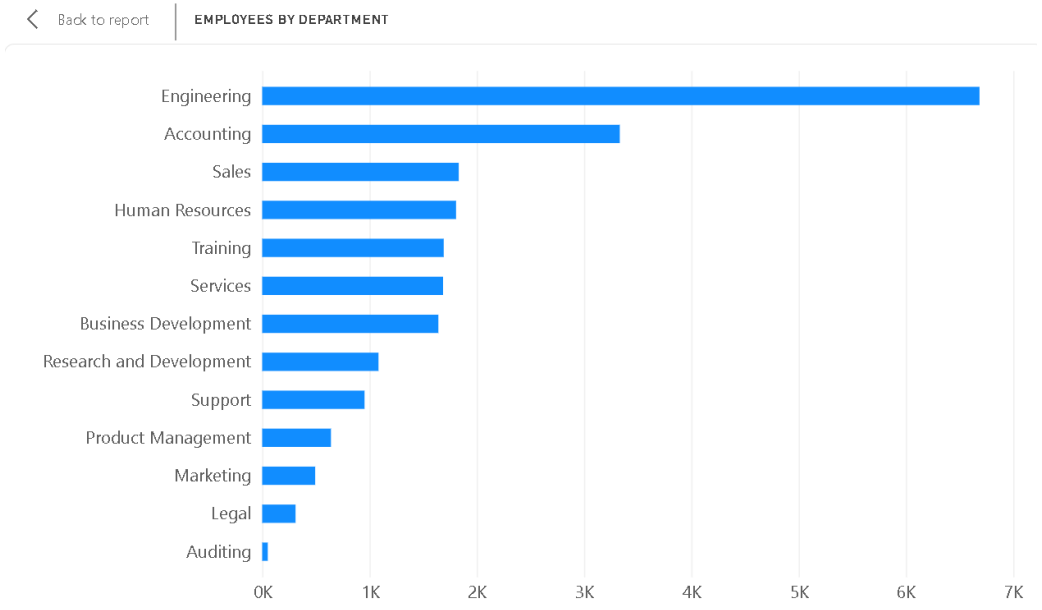

### Gender of Employees

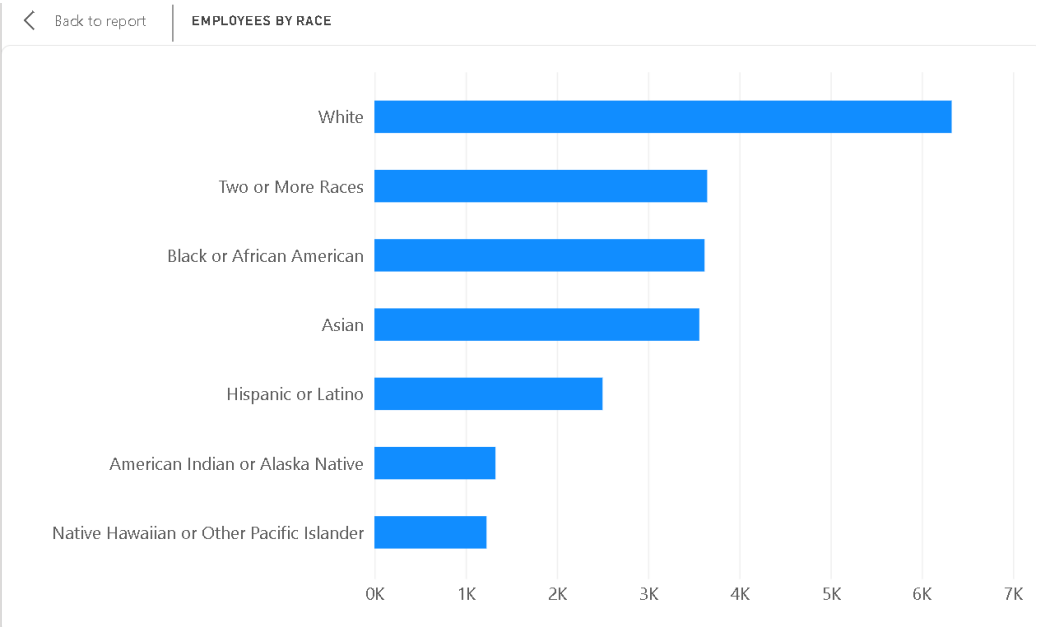

## Employees by State

## Employees by Department

**Employees by Race**

## 4. Key Insights

- Engineering is the largest department with 6,686 employees.
- Ohio is the dominant workforce location with 18,025 employees.
- The workforce is predominantly Headquarters-based (75.25%), with 24.75% working remotely.
- Gender representation is relatively balanced: Male 50.81%, Female 46.46%, and Non-Conforming 2.72%.
- White is the largest race category with 6,328 employees.
- Annual hiring is broadly stable around 1,000–1,150 employees in most years; 2018 has the highest count at 1,147.

## 5. Business Recommendations

- Review engineering workforce capacity regularly because it is the largest department.
- Evaluate Ohio's high geographic concentration and consider broader talent distribution where appropriate.
- Use role-level productivity and retention measures when evaluating future remote-work expansion.
- Monitor diversity by department and job level in addition to overall workforce representation.
- Use historical hiring patterns as a baseline for workforce and recruitment planning.

## 6. Conclusion

The dashboard provides a concise view of workforce size, work location, age profile, hiring trends, gender distribution, geographic concentration, departmental structure, and workforce diversity.
