PRDA – 03 HR Analytics

Task:

1. Get data from the database with the given credentials.
2. Create 3 KPI's that list the number of employees, percent of workers working remotely and in HQ and the average age.
3. Create a Line chart showing the hiring rate By Year.
4. Create a Donut chart representing the gender of employees.
5. Create 3 Bar charts showing employees By State, By Department & By Race.
6. Analyze all the features and derive multiple insights.
7. Visualize the data using Tableau /PowerBI and derive insights and give your inputs/suggestions to the company.

About Dataset:

HR Analytics can provide valuable insights and benefits to organizations in many different areas, from talent acquisition and retention to workforce planning and diversity and inclusion. By leveraging HR Analytics, companies can gain a competitive advantage by developing data-driven strategies that help them attract and retain top talent, improve employee engagement and performance, and foster a positive and inclusive workplace culture.

This particular dataset holds 13 columns and 22,214 records. The 13 columns has information like their name, birth date, race, what department they work at, their job title, remote/HQ, hire date, term date, city and state.

Database Credentials:

Host:	18.136.157.135
Domain Name:	projects.datamites.com
DB NAME:	project_hr_analytics
Table Name:	HR
Username:	dm_team9
Password:	DM!$!Team9!20@4!23&

Attribute Information:
